

Tweople.com

by Don Varner on 04/08/2010

Tweople has done great work for me, always professional. I will continue to use them for all my Walk On Videos.

by uspostalsol on 04/08/2010

We could not be happier with our Walk On Videos. Not only was the process super easy, but they even offered additional suggestions that we did not consider. Professional staff that are quick to respond. We have recommended them and will continue to do so. Want to see their work?

Does having a Walk On Videos make a difference?

It does if you want to build trust. And isn't that the one most important deciders that a customer needs in order to choose who they are going to do business with? Trust?

Who do you trust? A company or service that you can only read about? And aren't you only reading what they say about themselves?

No, you want to meet a person. Look at their face, their eyes, their body language. Then you can decide for yourself if there may be trust.

So whether you walk on to your own website or choose one of our professional video presenters - you can build trust in ways your competitors can not.

Unless they find out about us too! Then beat them to it!

Is your website a place of business?

When you walk into an office or storefront of a product or service you have an interest in- what do you expect to find- no employees, staff or representatives and a slew of brochures, fliers and sales collateral to study?

"Here Mr. or Ms. Customer, have a seat, read all about us. Here is a brochure to tell you who we are, another to look at our products, one with testimonials and if you like what you see... fill out an order form"

Wouldn't you rather meet someone that is representative of that company to learn if they are the kind of company you want to do business with and have them tell you about who they are and what they have to offer? Now you can learn about the products or services and if they are the kind of people you can trust to do business with.

So why do so many hide behind their website since people want to do business with people?

When you think about it, it just does not make sense to **not** meet the potential clients or customers that you have spent so much money and time to get them to visit your place of business. And when they do are you hiding behind your sales pitch?

Sure you have to offer them the product and service they want. It has to be as good or better than what others offer. But the most important part of the transaction is you. You have to give them a reason to choose YOU over the competition!

Face it - we have lost the art of person to person contact. We spend so much time behind a keyboard communicating with customers that we don't know what to do if the phone rings. Maybe that is why so many websites don't promote a phone number. They don't know how to TALK to customers!

So what do you do to personalize the website storefront or office?

Staff it with real people as Walk On Videos. If you don't want a Walk On Videos to be on your web page - add a website video or YouTube video starring one of our spokesmen or spokeswomanen.

It's easy - pick one of our actors - write a script and in no time at all you too can have a Walk On Videos that turns your plain text and graphics web page into a live website that grabs the attention of your potential customers and clients.

Real People Real Results Real Trust Real Walk On Videos

ARE YOU SPENDING AD DOLLARS TO GET POTENTIAL CUSTOMERS AND CLIENTS TO VISIT YOUR WEBSITE?

When they do visit your site to meet you or someone - Do they?
Or do they just see a lot of pictures and words?

Step out of 1999 and start talking to your website visitors. Whether you walk on to your site or use one of our actors, the result will be the same because people do business with people - not websites.

Here at Tweople - Tiny Web People you can bring your website into the video revolution where site visitors expect a visual experience. Whether you use one of our website spokespeople in a YouTube or website video or you have them in a Walk On Videos - they will bring it to life. And for less than you ever thought possible.

So what if you want to be in your own Walk On Videos? Or do you want to star in your own website video or YouTube Video? Not a problem. We have several ways to turn you into a Tweople or Tiny Web Person.

Why Tweople.com?

Although there are more and more companies cropping up to offer a Walk On Videos - none can match the experience and value we give to our clients and customers.

Over 12 years ago we began serving communities across the U.S. with our brand of Neighborhood websites- Not one or 2 but 1000's. Early on we recognized that our advertisers and community residents could benefit by having a Walk On Videos greet them with neighborhood news - kind of like a newscast. We developed the service, software and gained experience being on 1000's of sites before most even recognized the upcoming trend. And our customers got it for free.

It wasn't until several years later, after we had it perfected, that we began offering our services to the general public for less than any other company. Since our development costs were already paid for being one of our neighborhood website services - we were not forced to pass that cost on to you as others are.

Now we know that today you may find one or 2 claiming to be cheaper by a few bucks. But only having a few actors to choose from, inferior video product, sound, lighting and the service to make sure it works on your site and where you want it isn't going to save you - you will in most places have something you can't use or is down right embarrassing.

So to make sure you get all you need we have added a long list of services that you really need at no additional cost - things like hosting your Walk On Videos on streaming video servers, music, YouTube Video, lead capture forms, graphics and all the service you will ever need.

And if you have any questions- call us- we answer our phones!
